

## **Global Business Connectivity Provider, IP Access International to Demonstrate Emergency Communications Interoperability Solution with Raytheon's JPS Communications at DRJ Fall World 2006**

SAN JUAN CAPISTRANO, CA., September 14, 2006 / PRNewswire/ -- IP Access International, Inc. (IPA) and Raytheon's JPS Communications will be exhibiting together in San Diego, Ca. during the Disaster Recovery Journal's Fall 2006 Exposition September 17 – 20. IPA will be demonstrating the optimization of Raytheon's Tactical Unit ACU-T1000 over the mobile Internet over satellite network. This demonstration will exhibit interoperability between multiple radio systems (including HF, VHF, UHF, P25, 800Mhz, and NexTel™) within a region as well as extending this interoperability bridge (via satellite link) to other ACU-T1000 units across the country.

“We are excited to demonstrate IPA's emergency response packages which gives instant access to voice, data, and Internet services within minutes over satellite. Now, through this world-class technology, we are expanding the communications by interlinking the solution and expanding the range of Emergency Response communications nationwide. We are delighted to broaden our Emergency Response service offerings and improve the range of the necessary services.” says Bryan Hill, President, IP Access International, Inc.

IP Access International and JPS personnel will be available to answer questions at both their inside exhibit booth (booth #16) and outdoor mobile command vehicle (exterior exhibit space #2)

### **About JPS Communications**

JPS Communications, a wholly owned subsidiary of the Raytheon Company, designs, manufactures and sells electronic hardware and software products that enhance the effectiveness of communications systems. The company's mission is to extend communications capabilities through the use of advanced digital technology. Headquartered in Raleigh, NC, the company's focus is on radio interconnect products. JPS offers unsurpassed local, regional, state, and wide-area interoperability by linking radios (HF, UHF, & VHF), Nextel, SATCOM, cellular, WiFi and regular phones directly and over networks. For more information, visit <http://www.jps.com>
