

IP Access International Joins the Polycom ARENA Program

Integration of IP Access International satellite solutions with Polycom Unified Collaboration platform will enable video in remote locations and during terrestrial outages.

San Juan Capistrano, Calif. – August 9, 2007 - IP Access International (IPA) - the leader in remote, mobile and disaster satellite communications, today announced it has joined the Polycom ARENA partner program. Polycom, a leader in unified collaboration communications, initiated the ARENA program to allow software application providers, hardware device manufacturers, and conferencing solution providers to integrate their products with Polycom's industry leading unified collaboration platform to create new applications.

The IPA voice and video over satellite solutions will enable new vertical solutions on the Polycom unified collaboration platform by enabling video in remote locations for global communications for all market verticals.

“Polycom and IP Access International are giving customers real time video collaboration solutions that will span conference rooms, desktops, remote sites, mobile hand-held devices and desktop productivity tools,” said Bryan Hill, president of IP Access International. “The Polycom ARENA program has enabled IP Access to further build on its customer and partner base and succeed on our ever-expanding market vertical reach.”

“Polycom and its ARENA ecosystem partners such as IP Access International are focused on proliferating new collaborative communications solutions that will benefit organizations worldwide. IP Access International's high speed, low latency satellite networks with application-based Quality of Service for fixed and mobile satellite solutions addresses access to video collaboration in remote locations,” said Mark Roberts, vice president, Polycom ARENA program. “We are pleased to welcome IP Access International into the Polycom ARENA program and look forward to working with them to deliver this important solution to customers.”

As part of the agreement, IP Access International will leverage the Polycom platform, brand, and channels to bring this solution to market. Polycom ARENA ecosystem partners can develop, test and certify interoperability between their solutions and the Polycom platform of voice, video and content collaborative solutions. In addition to platform API's provided to developers, the Polycom ARENA offers a number of marketing and sales tools for business development managers as well as marketing and sales professionals via an online portal. These tools help partners speed time-to-market for their innovative unified collaborative solutions as well as broaden the reach to customers worldwide.

Pricing and Availability

The IP Access International voice and video over satellite solution is available today. For more information about the solution, visit Polycom ARENA partner solution showcase at www.polycom.com/ARENA.

About IP Access International

IP Access International is a global satellite provider supplying Internet, voice, video and data connectivity solutions to businesses around the world. We service all key industry verticals including energy, oil and gas, mining, forestry, medical, construction and agriculture with fixed and mobile solutions. Our customers use our services for full time, back-up and occasional use. We are one of the only satellite providers capable of extending corporate networks to remote sites by utilizing IPSEC encrypted links that are specifically designed to support legacy mainframe database applications as well as Citrix, SAP, Lotus Notes, Voice and high resolution Video. With advanced satellite communications on land and sea via a sophisticated infrastructure of linked satellites and land networks, IP Access International provides multi-network communications all through a single source provider to both US as well as International locations.

IP Access International's global headquarters are located in San Juan Capistrano, California, U.S.A.
