IP Access International Aligns with Compass Energy Solutions

Mobile satellite leader leverages solar powered technologies developed by Compass Energy

San Juan Capistrano, CA - March 10, 2008 — IP Access International (IPA), a global commercial satellite service provider of voice, video and data connectivity solutions, today announced strategic alliance with Compass Energy Solutions, a provider of solar and wind generated technology solutions. Partnered with Compass Energy Solutions, IPA's mission is to provide reliable and renewable energy solutions to rural, remote and temporary applications.

Leveraging the alternative energy sources developed by Compass Energy Solutions, IP Access International's mobile and fixed satellite services will provide mission critical communications to supply the power needs of military, humanitarian, emergency-response and disaster relief operations. Powered with Compass Energy's solar and wind technologies, IPA can provide the necessary Internet, voice, data and fax capabilities, required during times of crisis. The alignment of Compass Energy and IPA is ideal for interim or on demand shelter environments, in remote areas lacking communication infrastructures and for mobile communications in the event of an emergency, disaster or electrical power outage.

The need for reliable and renewable mobile communications is imperative in today's environment. Compass Energy Solutions provides clean, independent and renewable power sources—while IP Access International provides the bandwidth and connectivity with its fixed and mobile satellite communications. This relationship provides communications in areas where terrestrial communications are inoperable or not present to agencies worldwide, specifically military, humanitarian, emergency and first-responders.

"It is a pleasure to announce our partnership with Compass Energy Solutions, a known leader in solar and wind power solutions," stated Bryan Hill, president of IP Access International. "We are confident in developing strategic solutions with Compass Energy, thereby offering the very best in satellite communications where interim infrastructures are needed for disaster relief or first responder and emergency communications."

Providing solar powered generators, portable water filtration systems, solar lighting and portable survival systems, Compass Energy Solutions will provide customers the added benefit of IPA's multi-network communications platform including Internet, voice, video, data and two-way connectivity solutions to remote and mobile agencies. Customers can benefit from the joint efforts of IP Access International and Compass Energy, whose alliance offers advanced technology solutions for full time, remote, occasional use, fixed or mobile satellite services. For more information please visit <http://www.ipinternational.net>.

"Partnering with IP Access International enhances our value offering," added Alex Echeverria, Compass Energy's President. "Our goal is to provide the finest quality solar and wind energy products worldwide. Working with a leading satellite communications provider adds the ability to provide customers the security of clean, renewable and dependable equipment as well as a reliable connectivity and communications infrastructure."
