

Star-Batt Plus

Rapid Deployable Connectivity. Anywhere.

Stay Connected When Infrastructure Fails

The Star-Batt Plus is a rugged, FAA-compliant portable power and connectivity platform built exclusively for the Starlink Mini, delivering over 24 hours of runtime through a 624Wh LiFePO₄ battery system with six hot-swappable batteries. Housed in a durable Pelican™ 1450 case, it transforms the Starlink Mini into a fully deployable off-grid communications hub for emergency response, enterprise, and government operations, while supporting secure hardwired networking through built-in Ethernet pass-through and additional charging for critical field devices.

What This Solution Is

A self-contained, portable communications kit designed for:

- Emergency response
- Incident command
- Rural & off-grid operations
- Disaster recovery

USE CASES

- Wildland fire response
- Search & rescue operations
- Mobile command units
- Rural EMS & healthcare
- Utility restoration crews

Open the case. Power on. Get connected.

Portable Power + Starlink Integration

Star-Batt PLUS

- Built specifically for Starlink Mini
- 24+ hours of runtime on a single charge
- Rugged, weatherproof case for field deployment
- Multiple charging options: AC, vehicle, solar
- FAA-compliant removable batteries for travel

High-Speed Satellite Connectivity

Starlink (via IP Access International)

- LEO satellite connectivity for remote operations
- Rapid deployment with minimal setup
- Supports real-time applications (video, CAD, voice)

IP Access International is an **Authorized Starlink Reseller**, enabling:

- Centralized management
- Pooled data plans
- 24/7/365 NOC support
- Integration into SuperGIG™ blended network
